Axiology in Action:

Win the NEW Game of Coaching™!

Axiology is the science of human value, the study of how we think and order things.

It is the ONLY science that can measure your value talent. It does so with the accuracy and precision of a thermometer measuring your body temperature!

It has been a deep source of wisdom for me and thousands of other people I've shared it with over the past 15 years. For some people the impact has been profound.

Axiology creates NEW possibilities to enrich your life, NEW opportunities to enliven your livelihood, NEW avenues to earn a more prosperous living in the helping professions.

This “NEW Game of Coaching” briefing will show you:

- How to create more active, passive and residual income playing “The NEW Game.”
- How to get paid for value, expertise and results, not time.
- Why the OLD game produced too little success and prosperity for too few people, and how “The NEW Game” will change all that.
- Why the science of Axiology (human value) will sweep the coaching world, and how you can get in this game and on the field first.
- How the “Value Profile” can triple your practice size and double your income.
- How to succeed and prosper in the lucrative executive and corporate coaching arena (from someone who has done it for 17 years).
- How to eliminate rejection forever, and turn everyone into a networking resource.
- How to attract, convert and keep more coaching clients.
- How to boost the value of the best asset you have: YOU!

Are you ready to get paid what you're REALLY worth?

We invite you play "The NEW Game of Coaching!"

This is a very different game. It's a positive experience in self-understanding, self-exploration and self-discovery that provides totally new distinctions you can use to eliminate what holds you back. The new game propels you forward.

Science converges with philosophy and business and gives you NEW tools to MASTER and CONTROL the driving force in your life: **YOUR THINKING!**

If Thinking Creates Reality, Then Knowing "How" You Think Triggers Transformation!

Axiology is a science that brings new insights into HOW you value, make judgments and choices, what you pay attention to and how much clarity you have. With this NEW perspective you become more effective in the world outside, and the world inside.

I've been a student of Axiology for 15 years, investing thousands of hours learning and leading groups to apply the principles and distinctions in daily life. I also teach Axiology. The results I see people achieve are impressive. Even more impressive is...

How much better people feel about themselves in all areas of life!

We're sponsoring a one-of-a-kind experience at a one-of-a-kind price for friends of...

ACCPow and Milana Leshinsky!
